

En associant le bois et l'acier finition mate le designer crée SHERWOOD, une collection à l'empreinte scandinave pour une ambiance sereine dans les espaces de bureau et de collectivité.

Toute en rondeurs, la patène réalisée en hêtre usiné dans la masse inscrit d'emblée l'objet dans une relation sensorielle à l'utilisateur.

Combining wood and steel, the designer has created the SHERWOOD collection in a scandinavian style to fit harmoniously in open spaces and collective areas.

The hook in the shape of a plain beechwood stone machined in the mass involves a sensorial relationship with the user.
