

NALA-13 90-litres upper-mouth waste bin with 2 square holes and transparent door

Large capacity rectangular metal bin with transparent door to view the interior content. Possibility of placing concatenated or forming islands for selective collection.

Body made of steel with folding on all sides to give rigidity to the assembly.

Internally reinforced door between its diagonal vertices. It has a compression lock and is attached to the body by means of a piano-type hinge to facilitate its opening and, in turn, the removal of the inner bag.

It incorporates a removable bag-holder ring inside.

Head with an inclination of 15° with respect to the ground to prevent the user from depositing any waste on the perimeter of the head.

The head has 2, 126 x 126 mm square holes and waste identification vinyl.

All the element finished in epoxy paint colour to be determined.

Measurement: 500 x 302 x 740 mm.

Capacity: 90 litres

Functional maintenance: It does not require functional maintenance. Recommended cleaning with a neutral product and a damp cloth.

Fire resistance: Due to the characteristics of its totally metallic materials, the container can be classified as V0.

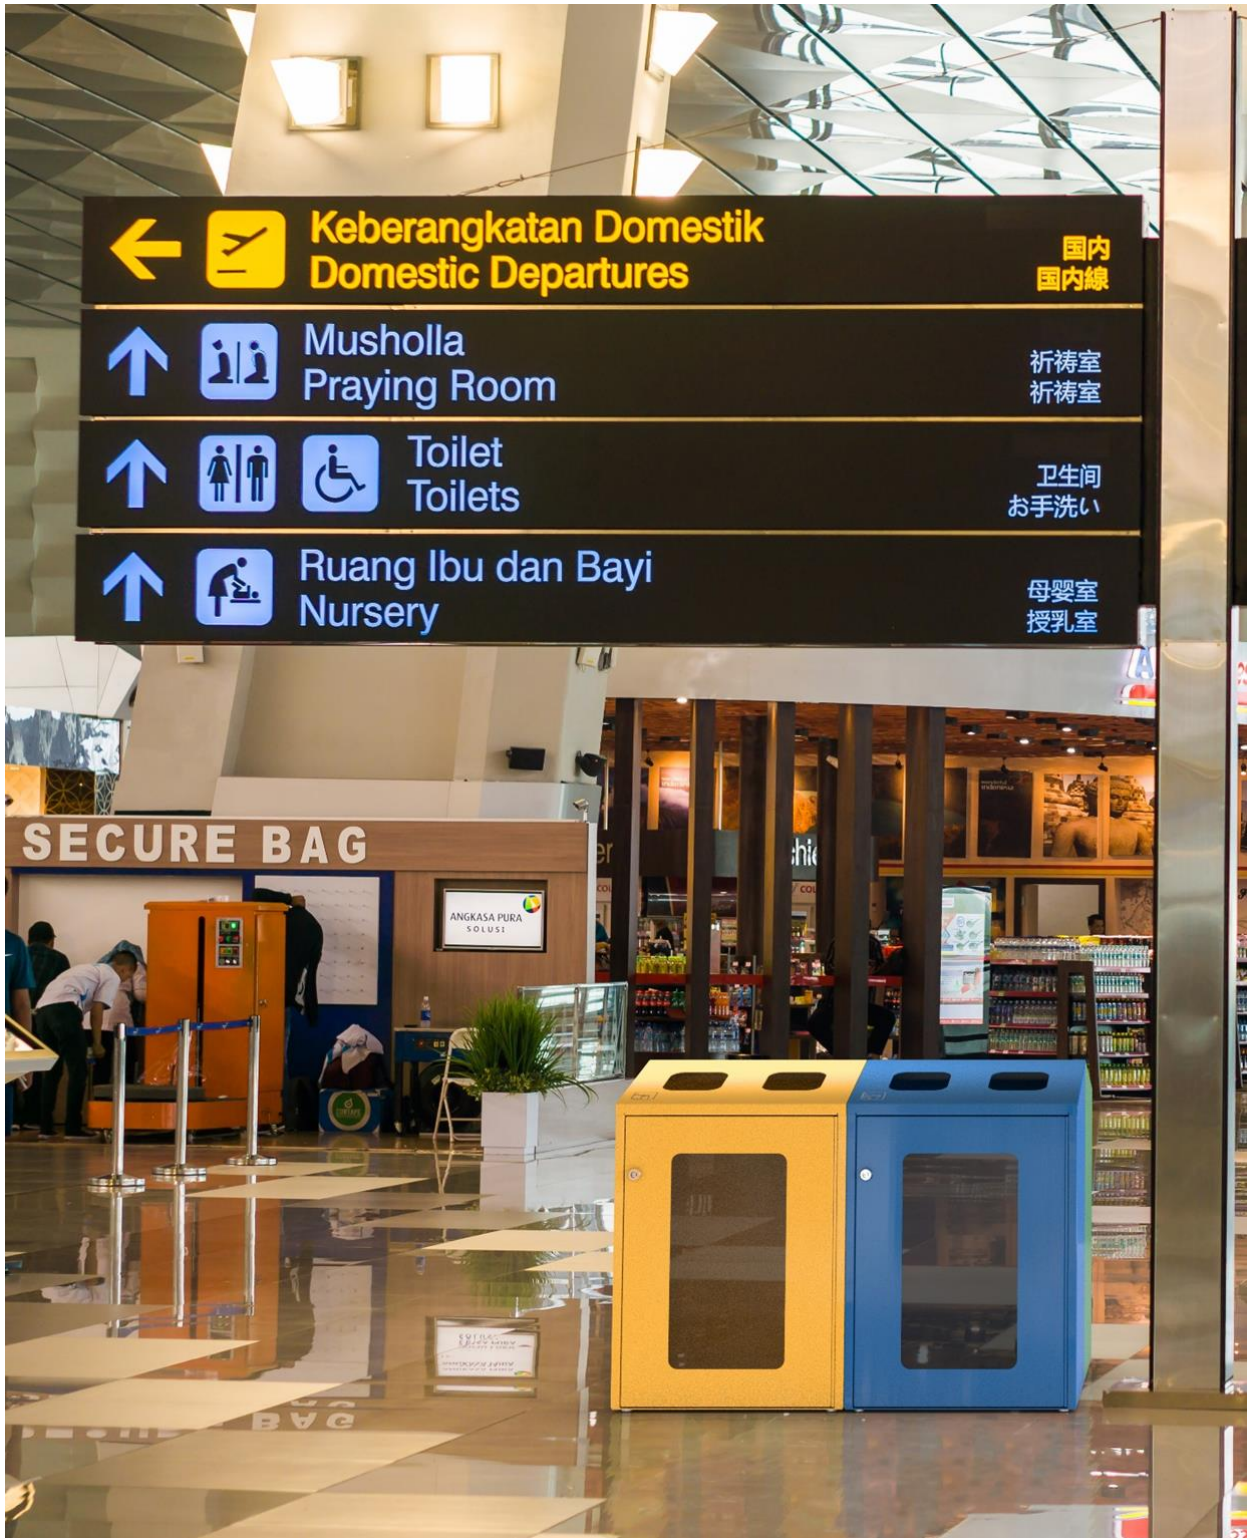

NALA-13 90-litres upper-mouth waste bin with 2 square holes and transparent door

Can be combined with all Nala models
