

SIVA-20 Container 4 waste

Large capacity metal container for indoor use, which allows selective waste collection by means of 4 holes (3 round holes and 1 narrow hole).

It has individual iron plate bag-holding rings for easy emptying. By opening the hinged top lid with handle, made of epoxy-painted sheet iron, RAL colour to be determined, each of the inner bags can be accessed by means of four retaining hinges.

The main body is made of sheet iron and finished in epoxy paint, RAL colour to be determined. The body sits on a stainless steel base.

The upper lid incorporates vinyls in each of the holes to indicate the different types of waste.

Dimensions: 1176 x 348 x 840 mm.

Capacity: 280 Litres (4x70 l.).

Functional maintenance: No functional maintenance required. Cleaning recommended with neutral product and damp cloth.

Fire resistance: Due to the characteristics of its all-metal materials, the container can be classified as V0 (see Fireproof Test Certificate).
